Keval Somnath Sukase

Java Developer

Pune , Maharashtra 411014 * Email: kevalsukase1999@gmail.com * Contact No: +91 9370548799

I have Total 3.5 Years of Relevant experience in developing various Web based applications using Core Java and Advanced Java and React.js for front-end Technologies.
Experience in Core Java, J2EE, Spring MVC, Spring Boot, Hibernate, JDBC, Servlet, JSP, Apache Tomcat, Maven.
Experience in Web Application development.
Knowledge of Microservices Architecture, design pattern Singleton, Factory, MVC.
Knowledge of web-based version control repository GitHub. Capable
of analyzing new features, coding, writing unit-tests.

TECHNICAL SKILL SET

Programming Language	Core Java, J2EE , React js
Frameworks	JDBC, Hibernate, Spring MVC,Spring Boot
Database	MySQL, Oracle
Build Tools	Maven
Code Repository	GitHub
IDE	Eclipse
Web/Application Server	Tomcat
Technologies	HTML, Bootsrap, JSP, Servlets, CSS, JSON
Awareness	Microservices Architecture

EXPERIENCE

EXPERIENCE

Organization: Sellcraft Global Solutions **Duration: Aug 2024 –Present**

Designation: Java Developer

As a Java Developer, my key responsibilities included:

- Migrating two projects from .NET and Angular to Java Spring Boot and React.js.
- Developing and integrating backend services using Spring Boot.
- Implementing REST APIs and handling database migrations.
- Enhancing frontend features using React.js for better user experience.
- Collaborating with cross-functional teams to ensure smooth project migration.
- Debugging and resolving issues related to code migration and performance optimization.

PROJECTS

- Project Title: Vendor Compliance

- Environment: Java, Spring Boot, React.js
- Database: PostgreSQL, MongoDB (for file and image storage)

Project Description:

The Vendor Compliance system is designed to manage vendor registrations, policy compliance, and document approvals efficiently. The system consists of two parts:

1. Admin Module:

- Allows administrators to register vendors and assign them specific fields.
- Manages vendor details and tracks compliance requirements.
- Receives and reviews submitted vendor documents for approval.

2. Vendor Module:

- Vendors can log in to the portal and review assigned policies.
- They can accept policies and upload necessary compliance documents.
- Submitted documents are forwarded to the admin for review and approval.
- The project ensures a seamless vendor onboarding process, document verification, and compliance tracking, improving operational efficiency.

Organization: U&B IT Consultancy PVT LTD **Duration: Jan 2024 to July 2024**

Designation: Java Developer

As a Junior Java Developer working on solving problems and finding bugs &
my responsibilities would typically include:

- Analyzing user requirements and understanding the problem domain.
- Collaborating with the team to identify and fix software defects.
- Debugging code issues and proposing solutions.
